

# PROJECT PROFILE

**PROJECT TYPE**  
Datacenter

**PROJECT LOCATION**  
Illinois

**PRODUCTS & SERVICES**  
Battery Monitoring System Installation  
Battery Monitoring System Maintenance  
Battery Capacity Testing  
Thermal Infrared Scanning

## Project Details

- In 2005, API installed and commissioned the client's Alber BDS-256 battery monitoring system on 14 battery strings.
- Every year, API conducts capacity (load) testing and thermal infrared scanning services on all critical battery systems. For each capacity test, the battery's discharge and performance data is captured with the BDS-256 and a comprehensive report is provided.
- API also performs quarterly preventative maintenance on the client's Alber BDS-256 battery monitoring systems to ensure proper operation and that it is calibrated to factory specifications.
