

PROJECT PROFILE

PROJECT TYPE

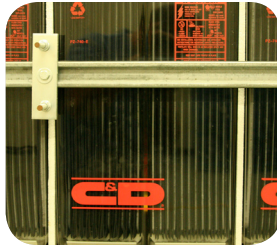

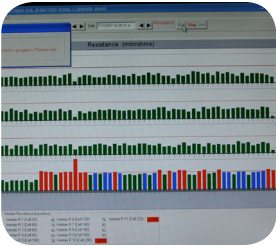

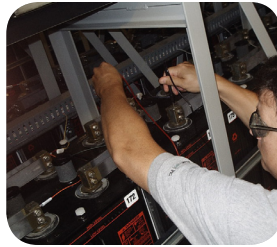

UPS / Datacenter

PROJECT LOCATION

St. Louis, MO

PRODUCTS & SERVICES

Battery Monitoring Installation & Commissioning
Battery Preventative Maintenance
Battery Monitoring Maintenance
Battery Installation & Removal

Project Details

At this mission critical datacenter, API is contracted to maintain their battery and battery monitoring systems from head to toe on a quarterly basis.

The site consists of three strings of 240 2v vented lead acid cells, and one string of 24 2v valve-regulated lead acid (VRLA) modules. Alber's BDS-256 Battery Monitoring system is installed on the three VLA strings.
