

PROJECT PROFILE

PROJECT TYPE
UPS, Switchgear, Emergency
Lighting

PROJECT LOCATION
Kansas City, MO

PRODUCTS & SERVICES
UPS & Battery Maintenance
Battery Replacements
Battery Capacity Testing

Project Details

API is contracted to provide both UPS (annual) and battery (quarterly) preventative maintenance services for this critical facility.

The facility has a wide array of battery types including flooded UPS, flooded Nicad switchgear and sealed UPS VRLA batteries.

The battery system for the emergency lighting inverter was replaced in 2010. An acceptance test was conducted after installation to verify the battery's capacity prior to placing it into service.
