

# PROJECT PROFILE

**PROJECT TYPE**  
UPS / Datacenter

**PROJECT LOCATION**  
Miamisburg, OH

**PRODUCTS & SERVICES**  
Alber BDS-256 Battery Monitoring  
Installation

**Contract Holder**  
Contract GS-07F-0668N

## Project Details

API was hired to install an Alber BDS-256 combined reading system on two strings of batteries, each consisting of 60 8v cells. Both strings are connected to one controller.

First, tab washers needed to be installed on each cell, and all Alber modules were mounted in the floor mounted racks.

Both discharge and float current transducers were installed and calibrated on this system.

**COMPLETE BATTERY SOLUTIONS**
