PROJECT TYPE

UPS & Telecom

PROJECT LOCATION

Kansas City, KS

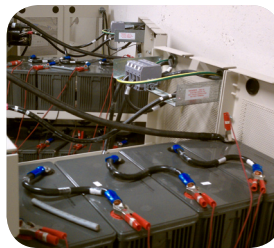

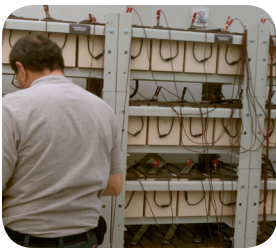

PRODUCTS & SERVICES

UPS & Battery Preventative

Maintenance

Battery Replacements

Battery Capacity Testing

Contract Holder
Contract GS-07F-0668N

Project Details

This long time client has tasked API with several preventative maintenance services. From UPS to battery maintenance, they trust API to take care of their backup power systems to ensure zero downtime.

In 2010, several batteries were replaced, including a UPS string. Energys Genesis XE95 Pure Lead cells (red and black cells shown above) were used on one of three UPS strings.

The client also has a Telecom room which we test and maintain.
