

PROJECT PROFILE

PROJECT TYPE
Datacenter

PROJECT LOCATION
Trumbull, CT

PRODUCTS & SERVICES
Battery Monitoring installation,
commissioning & preventative
maintenance

Project Details

At this critical datacenter, API installed, commissioned and maintained its Alber 256 and MPM-100 battery monitoring systems.

The battery systems at this datacenter are comprised of six UPS battery strings, each with 246 VLA cells. There are also 4 strings of generator start batteries monitored by an Alber MPM-100, and other vintage DCM-300 modules.
