

PROJECT PROFILE

PROJECT TYPE
Datacenter Expansion

PROJECT LOCATION
Kansas City, MO

PRODUCTS & SERVICES
Battery Cabinet Installation
IEEE-1188 Battery Inspection
Battery Capacity Testing

Project Details

This client needed a turnkey solution to backup the new UPS modules being installed at their new datacenter.

API was contracted to install the 12 battery cabinets, each containing a 480vdc EnerSys 12HX-505 battery system.

When the UPS modules are commissioned, API will conduct a comprehensive IEEE-1188 inspection, then capacity test each cabinet to ensure that each has their rated capacity.
