

# PROJECT PROFILE

## PROJECT TYPE

UPS, Datacenter

## PROJECT LOCATION

Kansas City, MO

## PRODUCTS & SERVICES

Battery Preventative Maintenance  
Battery Monitoring System  
Installation & Maintenance  
Battery Capacity Testing

### Project Details

At this corporate headquarters datacenter, there are 12 VRLA battery strings. API was contracted to install and commission an Alber BDS-40 battery monitoring system on each of the twelve strings.

Follow on quarterly preventative maintenance of both the VRLA batteries and battery monitoring system is also included in the scope of work. Each year, the client also contracts API to conduct the battery capacity (load) test.
