

# PROJECT PROFILE

## PROJECT TYPE

UPS / Datacenter

## PROJECT LOCATION

Silver Spring, MD

## PRODUCTS & SERVICES

Battery Preventative Maintenance  
Battery Monitoring System  
Maintenance

## Project Details

This datacenter consists of four different battery rooms, each with different sized vented lead acid batteries. There are 15 strings with 200 to 240 cells each. In addition, there is a generator room with six 24v battery strings.

At this site, API conducts quarterly battery and battery monitoring system preventative maintenance.
