

# PROJECT PROFILE

## PROJECT TYPE

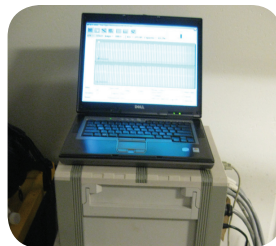

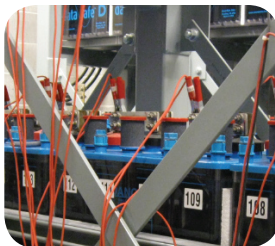

UPS, Datacenter

## PROJECT LOCATION

Kansas City, MO

## PRODUCTS & SERVICES

Battery Capacity Testing

## Project Details

This client contracted API to conduct capacity (load) testing on its two 460v UPS VLA battery strings.

Two 120-volt Alber DC Resistive load banks were connected in series to test these two 480v UPS Vented Lead Acid strings. An Alber BCT-2000 was utilized to capture the battery's performance data during the discharge test.
